PARTS & ACCESSORIES

BULLETIN NO. 6

December 20, 1946

TO ALL DEALERS:

Subject: Advance Chassis Parts List

We are pleased to send you herewith a copy of the Advance Chassis Parts List covering chassis replacement parts for the Frazer Model F-47 and the Kaiser Model K-100.

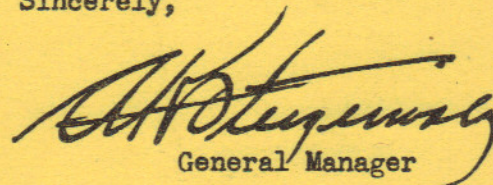

While this Advance Chassis Parts List does not contain any illustrations, the text is arranged in groups of related parts in functional order so no difficulty should be experienced in locating and selecting the parts required. Under the Group Index you will find a complete list of the Parts Groups which go to make up the complete book and under each Group the Sub-Groups into which each Group is divided. In the back of the book will be found a Numerical Index listing of the parts contained in the book in numerical sequence.

Before making extensive use of this book, we would suggest that the General Information Section in the front of the book be carefully read and studied. This section contains useful information as to the system employed in compiling the book, instructions for ordering parts, etc., and a thorough knowledge of these subjects will enable you to obtain full value from the book.

An Advance Body Parts List is being compiled now, and everything possible is being done to get a copy of this book into your hands at an early date.

Any additional copies of this book which you may require for use within your own organization will be gladly sent you upon request.

Sincerely,

  
General Manager
