PARTS & ACCESSORIES

BULLETIN NO. 9

January 20, 1947

TO ALL DEALERS:

Subject: Speedometer Gear and Driven Pinion

On Page No. 35 of the Advance Chassis Parts List under Group 9.286 you will find the listing of Speedometer Gears and Driven Pinions.

The information given in the parts book covering these items is not sufficient to permit proper identification of these parts or to enable you to check these parts in a car on which there may be a question of speed or mileage registration.

In order to correct the listing of these parts in the parts book and to give you the information you require for use in ordering or for checking cars for speedometer registration, we are giving you below a complete list of the speedometer gears and driven pinions used with the various rear axle ratios, and the information you need to identify the correct gears for each ratio.

<u>Rear Axle Ratio</u>	<u>Name</u>	<u>Part No.</u>	<u>No. of Teeth</u>	<u>Gear Diameter</u>
4.09	Speedometer Gear	200919	5	1.950
	Speedometer Driven Pinion	202000	15	.837
3.73	Speedometer Gear	202315	5	2.017
	Speedometer Driven Pinion	202314	14	.806
4.27	Speedometer Gear	200920	5	1.973
	Speedometer Driven Pinion	200921	16	.837

You will note from the above information that although all speedometer gears have five teeth not any of them are interchangeable, and the correct speedometer gear to use with each axle ratio is determined by the diameter of the gear rather than by the number of teeth.

We would suggest that the information shown in the body of this bulletin on these gears be typed on a separate piece of paper and be pasted on the blank page in the back of all parts books in use in your organization. If you handle in this manner, cross out the listing of these items on page 35 under group 9.286 and mark opposite these items, "See listing on back page". By so doing, you will avoid errors in ordering or identifying these parts. Correction will, of course, be made in the listing of these items in subsequent issues of the parts book.

Sincerely,

AK Steigerwalt
General Manager
