PARTS & ACCESSORIES

BULLETIN NO. 17

TO ALL DEALERS:  
(Except in the State of Texas)

March 3, 1947

Subject: Parts Price List and Confidential Net Parts Price List - Kaiser Model K-100  
and Frazer Model F-47

Enclosed herewith please find one copy each of the Parts Price List and the Confidential Net Parts Price List covering replacement parts for the Kaiser Model K-100 and the Frazer Model F-47.

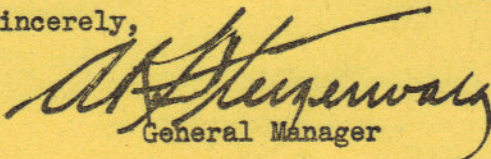

The Parts Price List contains the suggested selling prices to be used in selling replacement parts at retail. The Confidential Net Parts Price List contains the net prices at which these parts are invoiced to you by us and is supplied to enable you to audit invoices covering your parts purchases and for costing your parts sales.

The listing of parts in both price lists is in numerical sequence which permits ease in locating the price of any part after obtaining the part number from the parts book.

We suggest that you carefully read the title page of these price lists as it contains valuable information for ordering parts, as well as an explanation of the symbols and abbreviations used to identify the parts class, parts which are prime finish and parts and accessories purchased at quantity lot prices. Following the title page you will find an explanation of our method of servicing sheet metal parts. The net charge to you for painting sheet metal parts, which prices are not subject to any further discount, are shown on this page. The retail selling price of these operations should be established by you in line with the prices being charged in your locality for similar paint operations. On the inside of the back cover of the Confidential Net Price List you will find the quantity lot prices of accessories, lamp bulbs, spark plugs, and brake fluid.

Any additional copies which you may require of these price lists for use within your own organization will be gladly furnished upon request.

Sincerely,

  
General Manager
