

## SERVICE BULLETIN

TO ALL DISTRIBUTORS AND DEALERS:

This bulletin contains body paint information for all 1952 Kaiser and Henry J Models.

The factory does not stock service paint for distribution to the field. Therefore, all orders for paint and requests for mixing formulae or paint specifications must be directed to the Acme, Ditzler or DuPont paint jobber in your locality handling automotive finishes.

The paint manufacturer's identification code number must be used when ordering paint or requesting information from the jobber and may be determined in the following manner.

1. Identify the Kaiser-Frazer paint code number from the body code number plate located on the dash panel in the engine compartment of the car.
2. Locate the listing of that particular paint code in this bulletin.
3. Determine the basic color number for the color or colors which comprise the paint code.
4. Refer to the manufacturer's identification code numbers and use the basic color number to locate the manufacturer's number which you will use when ordering the paint.
